Subject: Application for MERN Stack Developer Position

Dear Hiring Manager,

I am applying for the MERN Stack Developer position at your company. I have completed my BCA (2022–2025) and have hands-on experience in full-stack development using MongoDB, Express.js, React.js, and Node.js.

I completed internships at FirstDigiAdd and Scalefull Technologies LLP, where I worked on real-time web applications, built responsive websites, and developed backend APIs using MERN stack and Git-based collaboration.

I also developed a Doctor Appointment Management System with JWT authentication and role-based access control, which strengthened my backend and database skills.

I am a quick learner, team player, and focused on writing clean and efficient code. I would welcome the opportunity to contribute to your team.

You can review my work on my GitHub and Portfolio website.

Thank you for your time and consideration.

Sincerely,  
Swarup Salunke
